

BATTERY ENERGY STORAGE SOLUTIONS

DP BESS - Battery Energy Storage Solutions has been established in 2021 and is a member of the DRAKOS - POLEMIS GROUP. We are primarily focused on new energetic directions based on EPC and EPCM projects in the field of **battery energy storage systems (BESS)** and energy solutions such as combined production of electricity and heat (CHP), heat production (gas boiler rooms) or photovoltaic plant on turnkey basis.

We emphasize the connection between **modern technologies** and expert **know how** with a strong **customer focus**. Our goal is to provide technological services for **more affordable and safer supply of energy throughout the European distribution network**. Thanks to this vision, we are able to meet the technological challenges of modern power engineering in a comprehensive and systematic way.

We provide comprehensive services for high-capacity battery systems including **design of custom solutions**, detailed project planning, procurement of equipment and materials, construction management oversight and all related services.

In the light of increasing share of electricity production from renewable sources and increasing number of decentralized sources, new demands and business opportunities have arisen in the field of **transmission and distribution network support and stabilization**, efficient use of renewable sources, reduced reserve capacity costs for industrial facilities, power factor compensation, coverage of the quarter-hour maximum or reliable back-up power during power outages.

DP BESS is the reliable answer to the highly demanding energy storage challenge.

**RESERVE ENERGY
FOR THE PLANET WE DESERVE**

D R A K O S · P O L E M I S

The logo for DPBESS features the letters 'D', 'P', 'B', 'E', 'S', and 'S' in a bold, sans-serif font. The 'D' is blue, while the 'P', 'B', 'E', 'S', and 'S' are green. To the left of the letters are three horizontal bars of increasing height, colored green, blue, and green from top to bottom. Below the logo, the text 'D R A K O S · P O L E M I S' is written in a smaller, black, spaced-out font.
